**1. Introduction & Update of KLCC Activities**

Ron gave a brief overview of 8 pieces of legislation in the hopper and explained that the purpose of today's meeting was to ask for an RFD to approve the changes in the re-draft amendments to the Sanitary Conditions Law (SCL).

**Sanitary Conditions Law (SCL)**

Heather gave an overview of her two final reports (30-Day Community Review & Report on Community Participant Feedback in the First Reading) noting that the feedback that was out of scope was mentioned on page 10 of her 30-Day Community Review Report, therefore, the scope for amendments remains unchanged on page 11. She then proceeded to read through the amendments to the SCL.

All amendments were approved by Council with the following additional changes to Section II in the SCL:

- 16.2 –Either remove the reference to DUMP as they no longer exist; or if it's to remain in the law, then a definition must be inserted.
- Correct typo in – 16.3 – should read, "...issuance or discharge *of* contaminants into the environment..." not, "...**or** contaminant into the environment."
- 16.5 – Suggested paragraph read with more clarity; just omit the word '*apparatus*'. Sentence could read, "...contain a description or activity contemplated..."
- 21. **PENALTIES**  
21.1 The Technical Team, (Heather and Francis), will reword this section to indicate a minimum and maximum fine but also include the option of additional penalties as well as increased fine amounts to be identified in a regulation. Wording could be "additional sanctions based on Regulations."

**Next Steps:**

- 1) The Technical Team makes the above additional changes to the SCL in the legal format and sends them back to Council for approval.
- 2) Once approved, LCC posts re-draft amendments of the Sanitary Conditions Law in accordance with Minimum Communication Standards for a period of 30 days.
- 3) The Technical Team will receive comment on the proposed changes within the 30-Day Review and submit these at the Second Reading.
- 4) After the 30-Day Review is over, the Second Reading will be scheduled whereby a review of the re-draft amendments to the SCL would be read to the community for their input.
